Morse code disguised as hit radio single relayed message to hostages in Columbia jungle

How the Colombian army sent a hidden message to hostages… using a pop song.
The Verge

The town without Wi-Fi

The affliction has been dubbed "electromagnetic hypersensitivity," or EHS, and it involves a textbook's worth of ailments: headaches, nausea, insomnia, chest pains, disorientation, digestive difficulties, and so on.
Washingtonian

Fixing poor squelch levels on Baofeng radios

Squelch levels improved somewhat over time, but it just wasn't enough. The slightest whisper of a modem, router or switch still opens up the squelch, whatever the setting.
